

# Mandibular central incisor

Permanent Dentition			
Tooth	Crown Completed (Years)	Eruption (Years)	Root Completed (Years)
<b>Maxillary</b>			
Central incisor	4-5	7-8	10
Lateral incisor	4-5	8-9	11
Canine	6-7	11-12	13-15
First premolar	5-6	10-11	12-13
Second premolar	6-7	10-12	12-14
First molar	2.5-3.0	6-7	9-10
Second molar	7-8	12-13	14-16
Third molar	12-16	17-21	18-25
<b>Mandibular</b>			
Central incisor	4-5	6-7	9
Lateral incisor	4-5	7-8	10
Canine	6-7	9-10	12-14
First premolar	5-6	10-12	12-13
Second premolar	6-7	11-12	13-14
First molar	2.5-3.0	6-7	9-10
Second molar	7-8	11-13	14-15
Third molar	12-16	17-21	18-25

Primary Dentition			
Tooth	Eruption (Months)	Root Completed (Years)	Exfoliation of tooth (Years)
<b>Maxillary</b>			
Central incisor	8-12	1.5-2.0	6-7
Lateral incisor	9-13	1.5-2.0	7-8
Canine	16-22	2.5-3.0	10-12
First molar	13-19	2.0-2.5	9-11
Second molar	25-33	3	10-12
<b>Mandibular</b>			
Central incisor	6-10	1.5-2.5	6-7
Lateral incisor	10-16	1.5-2.5	7-8
Canine	17-23	2.5-3.0	9-12
First molar	14-18	2.0-2.5	9-11
Second molar	23-31	3	10-12

1. The **first permanent** tooth to erupt is the **mandibular first molar**, followed shortly thereafter by the **maxillary first molar**.
2. The **first permanent** tooth to begin calcifying is the **mandibular first molar (at birth)**.
3. The **first succedaneous** tooth to erupt is the **mandibular central incisor**.

**Remember:** The mandibular first molar and the maxillary first molar **are not** succedaneous teeth.
