

Use the same answer options for the following questions.

1. Which portion of the ECG is the only isoelectric period when the entire ventricle is depolarized?
2. This portion of the ECG represents ventricular repolarization.
3. This portion of the ECG represents the period between ventricular depolarization and ventricular repolarization.

- QRS complex
- Q-T interval
- S-T segment
- P wave
- P-R interval
- T wave
